Create a deeper holding area with Glo-Ray® Dual Aluminum Infrared Foodwarmers mounted side-by-side, keeping hot food at optimum serving temperatures. The pre-focused heat pattern directs heat from a metal sheathed element across the entire holding surface. The continuous aluminum housing and heavy-duty mountings ensure the durability and quality of Hatco products.

Standard features

- Provides even heat distribution – no “cold spots”
- Pre-focused heat maintains safe serving temperatures longer
- Sturdy extruded aluminum housings that do not sag, from 18" to 144" (457 to 3658 mm)
- Metal sheathed heating elements guaranteed against burnout and breakage for two years
- Reflector does not blacken, maintaining a consistent heat pattern
- Coated shatter-resistant incandescent lights enhance product display while safeguarding food from bulb breakage
- Reinforced wire guard provides operator safety without affecting heat distribution
- 3" or 6" (76 or 152 mm) spacer available for in between units for deeper holding area
- Heavy-duty insulation minimizes heat loss
- Optional sneeze guard made of shatterproof, easy-to-clean acrylic provide safe food serving environment
- Additional reflector styles and lower wattage elements also available, please consult factory for more information

NOTE: For multiple circuit control options used with optional Tubular Stand Supports (ATL or NTL), the power supply may need to be located somewhere other than through the Tubular Stand. Consult factory for details.

IFS anti-microbial coatings use naturally-occurring, environmentally sustainable, silver ions to help inhibit the growth of microbes on the powder coated surface. See www.hatcocorp.com/antimicrobial-paint for more information.

∞ 120V models may require additional switches, (remote only) consult factory for applications.

‡ CE approved units for 220-230V utilize a 220V heating system; 230-240V CE units utilize a 240V heating system.

↗ 120V models with infinite switch require tandem (end-to-end) elements, consult factory for applications.

∞ Glo-Ray models 108"-144" (2743-3658 mm) and 120V models of GRAH(L)-84D and GRAH(L)-96D contain tandem (end-to-end) elements that may be individually controlled.

NOTE: GRAL-D and GRAHL-D models that have multiple voltages listed, such as 120/208 or 120/240 have multiple circuits. For example, a 120/208V unit utilizes 120V for the light circuit and 208V for the heat circuit(s). Consult the electrical diagram supplied with the unit for specific information.

CAUTION: Strip heaters equipped with incandescent lights that require a circuit breaker larger than 20 amps for the heat element must have a separate circuit breaker for the incandescent lights that is 20 amps or less.
